

Henry Bory Prevez

Full Professor | PhD in Automatic Control | Universidad de Oriente | Santiago de Cuba

Professional Summary

Full Professor and researcher in Automatic Control, power electronics, renewable energy systems, scientific software and applied mathematical modelling. Experience in university teaching, simulation, control systems, power converters, micro-hydropower, OTEC systems, virtual laboratories and scientific publications.

Areas of Expertise

- Automatic Control
- Power Electronics
- Renewable Energy Systems
- Micro-hydropower and Pelton Turbine Systems
- OTEC and Ocean Energy
- Scientific Software
- MATLAB/Simulink
- Python
- Modelling and Simulation
- Digital Signal Processing
- Computational Biophysics

Selected Results

- International projects: CRECE and IRIS.
- Software references: Niord, AnaRed, TabPer, Cal_Arr_Fre, Calc_Covid19.
- Publications in energy systems, control, educational software, COVID-19 modelling and computational biophysics.

Languages

Spanish and English. Dutch version of the portfolio is under preparation.
